

ELECTROSTATIC PRECIPITATORS

Course #281

Electrostatic precipitators are used to control fine particulates or aerosols in a variety of industrial processes. This course will provide an inside look at these control devices, outline the fundamentals of operating and maintaining ESPs, review applicable regulations and permits, and discuss inspection procedures. Air quality inspectors, site operators, and environmental professionals will find this information valuable in conducting inspections, minimizing emissions, and staying in compliance with air pollution regulations.

April 19, 2005
8:30 am - 4:30 pm
San Joaquin Valley APCD
1990 E Gettysburg
Fresno, CA 93726
(559) 230-6000

Students will participate in a "mock inspection" at a local facility, using equipment and techniques discussed in the classroom. The field inspection and an exam are required to obtain a certificate of completion.

Hard Hat, Safety Shoes, Eye & Ear Protection are required.
Enrollment fee may apply.
